Data Protection Update Workshop & Gap Analysis

Come along to the Data Protection Workshop for the latest on ICO updates, ongoing gap analysis and subject access request management. This event is hosted by FusionHR, education specialists especially for school leaders.

Data management and adhering to GDPR regulations is an ongoing process as the goal posts are evolving as cases appear and Brexit negotiations continue. However there are ways in which we can continuously work towards compliance with the legislation.

To do this we need to plug the gaps and identify the areas where we aren't quite there and assess the level of risk associated.

GAP analysis is key to this, picking out precise areas of concern and addressing them.

The event will give an insight into areas you may have not even considered.

We will look at:

- New cases from the ICO and what these mean for you
- Managing a subject access request and best practice processes for preparing for requests
- Differences between Subject Access Request and Freedom of Information Requests
- Ongoing gap analysis with breakout session and checklist
- Case study examples specific to schools

Half-Day Workshop

FusionHR now supports over 300 schools and our team has extensive education experience to share with you. As certified power presenters the team are passionate about improving education. The presenter is a GASQ EU GDPR Accredited Practitioner and Certified Data Protection Officer with specific experience within education.
